Neonatal Resuscitation Devices

Photographs demonstrating optimal mask placement technique, rolling the mask up the face, from the chin. (Photographs courtesy of Fiona Wood.)

How hold Type of Face Mask in Laerdel

Stem Hold

- Hold the meeting point of the 'trunk' and the mask with thumb and forefinger

Two-Point Top Hold

- Thumb and forefinger press the flat upper side of the mask
- The 'trunk' are not held

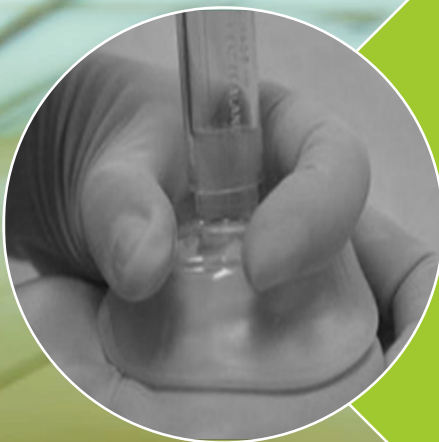

OK Rim Hold

- Thumb and forefinger form C (as OK sign)

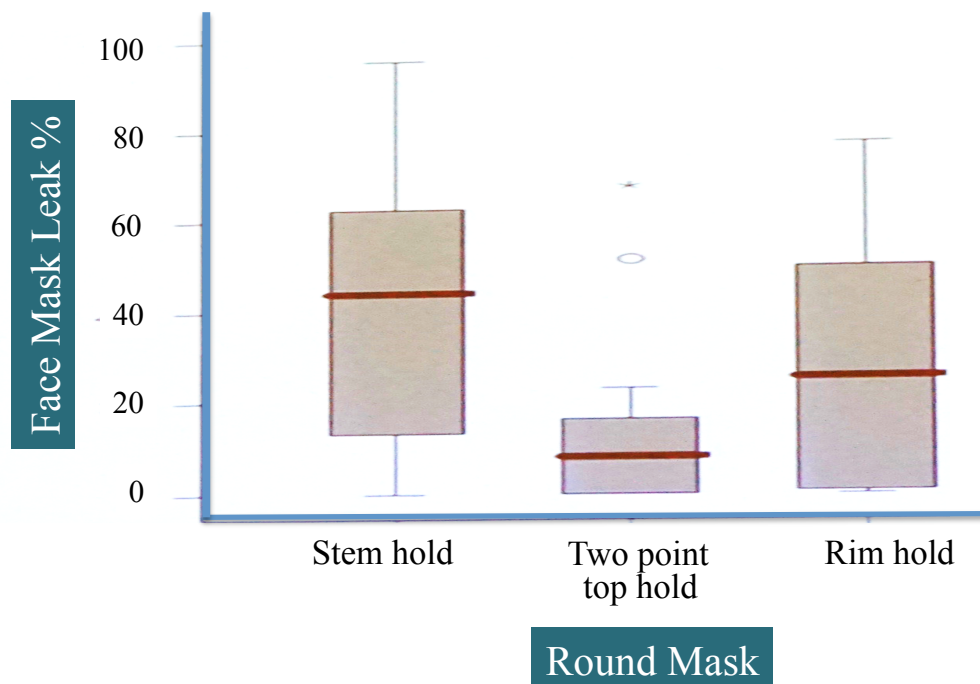

How hold Type of Face Mask in Fisher & Paykel

Rim Hold

- The left hand holds the lid, thumb and forefinger form the letter C
- 3 other fingers hold the edge of the lower jaw, lift the jaw up (jaw thrust)

Mask Technique Matters

- Mask correct size
- **Even** downward pressure – quite firmly
- Chin lift with as much upward pressure
